Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 1 is not tangible. The preamble of independent claim 1 recites "A computer screen displayed on a display device during a collaborative learning event, said display comprising ", which is directed to software, per se, lacking any hardware to enable any functionality to be realized. The claimed features and elements of independent claim 1 does not include hardware components or features that are necessarily implemented in hardware. Therefore, the claimed features of claim 1 is actually a software, or at best, directed to an arrangement of software, and software claimed by itself, without being executed or implemented on a computer medium, is intangible.

To expedite a complete examination of the instant application, the claims rejected under 35U.S.C. 101 (nonstatutory) above are further rejected as set forth below in anticipation of the applicant amending these claims to place them within the four statutory categories of invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by DeNicola et al. (US Patent No. 6,288,753).

Regarding claim 1, DeNicola discloses a computer screen display displayed on a display device during a collaborative learning event, said display comprising a first area displaying a streaming video of a collaborative learning event [..each remote learning location, a classroom camera records the students and conveys that video/audio; see col. 9, lines 3-47]; a second area displaying a slide providing information relating to the collaborative learning event; wherein said slide is associated with the streaming video [..realtime into the computer screen of the students, thereby allowing instructor to move and point to various items in the students computer screen; see col. 3, lines 31-67]; a third area displaying at least one of an archived document related to the streaming video and the slide, and a web page [..workbooks website, the Internet and browser multimedia material and audio; see col.16, lines 6-46 and figures 5-6]; and a fourth area displaying control options for selecting and displaying one of a list of events and a list of documents associated with the collaborative learning event [..the test is simultaneously evaluated and reported back to the end user; see col. 17, lines 1-44].
